

Calvert

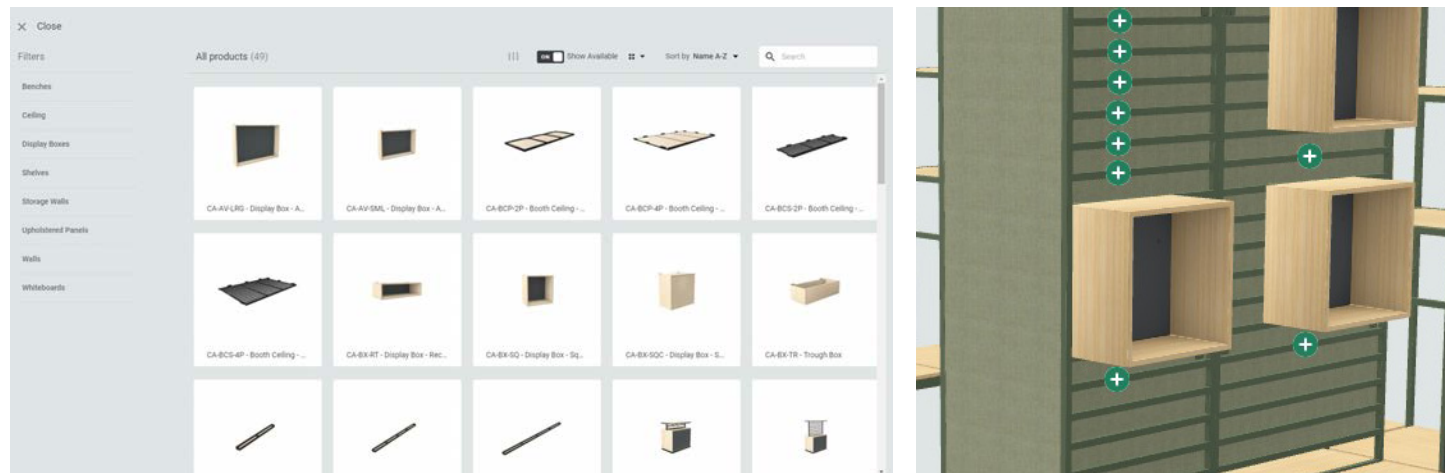

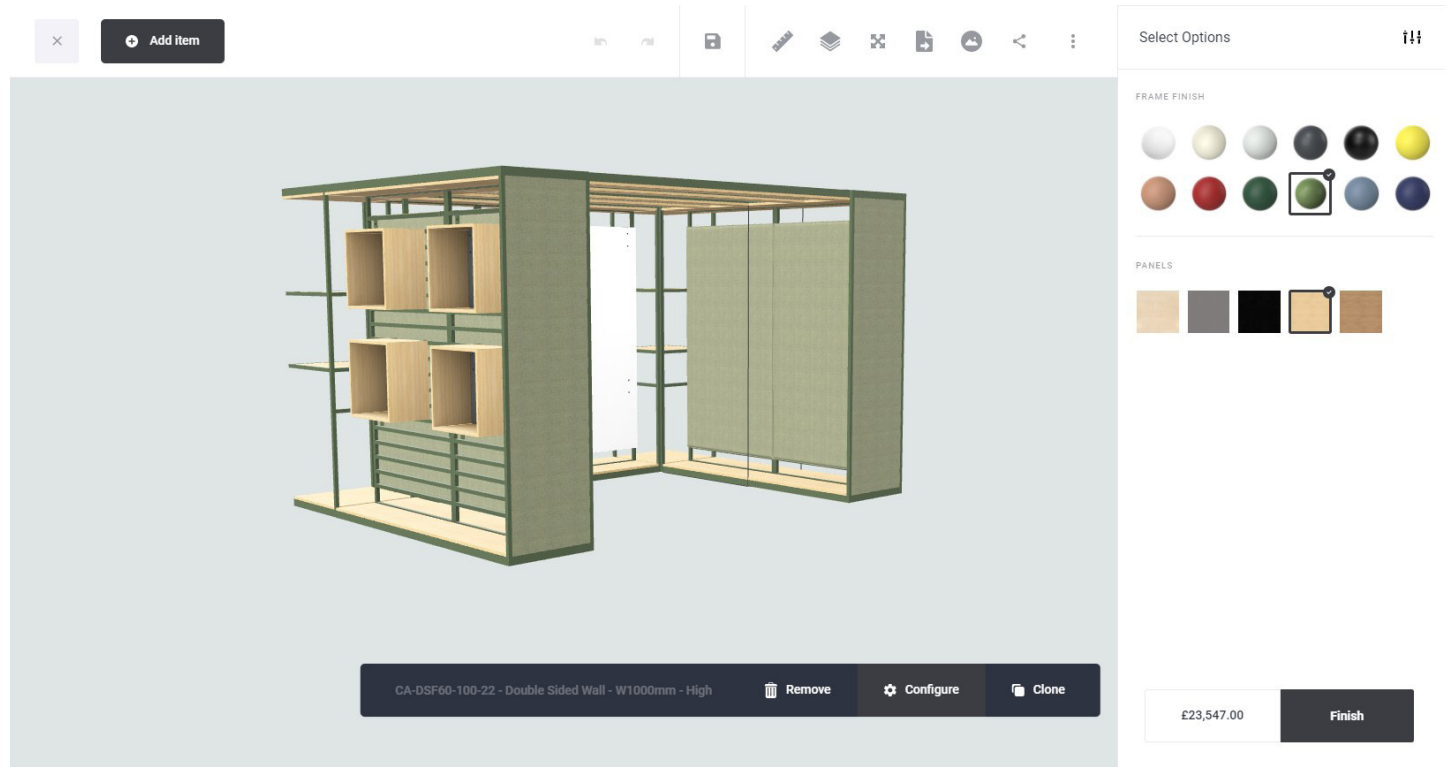

Inspired by Calvert Vaux, the mastermind behind New York's Central Park.
Breaking up a grid system to create spaces to focus, collaborate,
relax and inspire.

Steel frame walls, available in three heights, act as room dividers, with the louvre-style grid pattern diffusing visibility between areas without creating a definite wall.

Accessories, such as display cubes, shelves, AV boxes, dry-wipe surfaces and upholstered panels, along with benches and desk surfaces, can be incorporated to add flexible functionality.

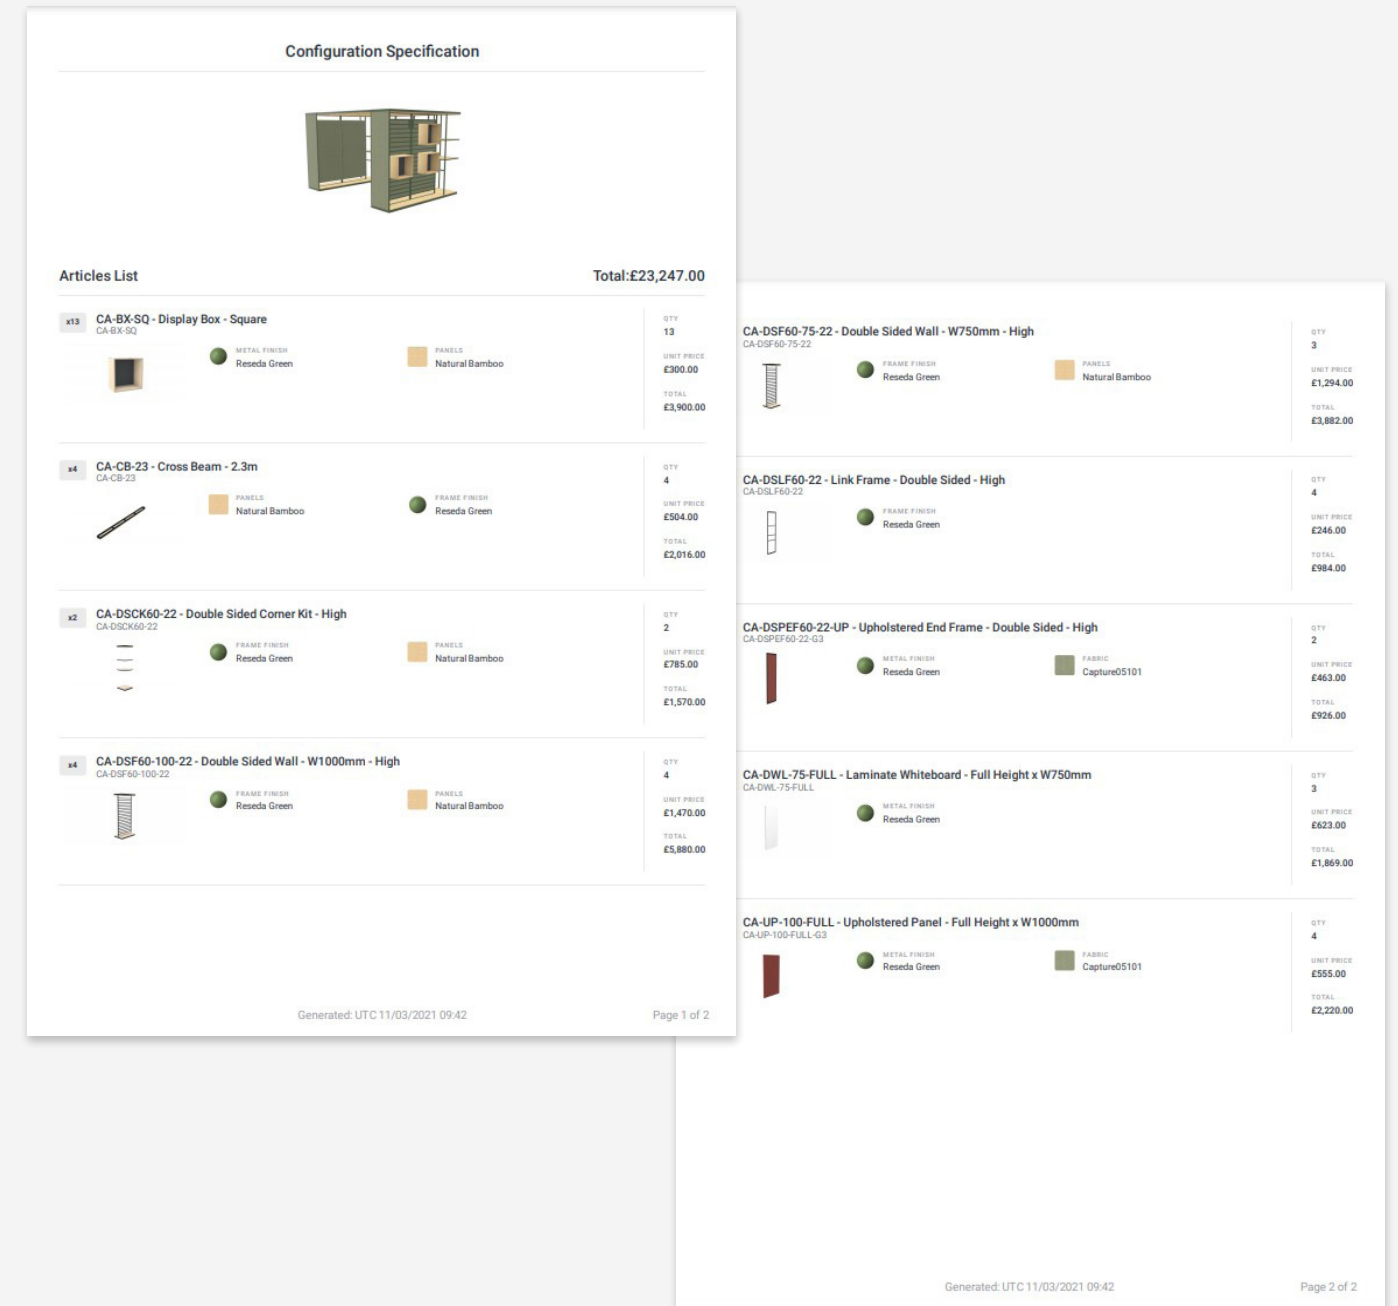

Infinitely scalable, the system can grow, adapt and be reconfigured as spaces evolve and can be used to create landscapes from simple partitions to all-encompassing 'room-within-a-room' environments.

Our online product configurator allows customers to build and specify their perfect **Calvert** layout in 3D simply and easily.

Wall frames can be assembled in any number of ways within the parameters of the system, with Link Frames automatically inserted to alleviate any errors in construction.

Finishes and materials can be selected to customise the look of the product to tie in with your scheme.

Once your perfect layouts are completed they can be shared with other users. High quality images from any view point can be generated for use in presentations, 3D files can be downloaded for integration into CAD models and a full component list, including finishes, created to aid in ordering.

Registered users can also access pricing, making specification, costing and ordering as simple as possible.

Contact a member of the Sales Team to arrange a quick training session and set up your account access.

1000mm Wide Storage Wall
CA-DSCB30-100-xx
W1000 x D600mm

For additional stability Wall Frames can be floor fixed. Alternatively, Steel weighted ballasts can be fitted to base panels

Tops of High Walls used in open atrium areas can be supplied with additional top panels to cap off visibility of fixings or cabling.

PLANTERS

Add planters to top of Low or Mid Frames. Solid finish options as per Wall Frames.

	750mm Wide Single Sided	750mm Wide Double Sided	1000mm Wide Single Sided	1000mm Wide Double Sided
Product Code	+PL	+PL	+PL	+PL

Note: Plants not included. For real planting a waterproof flexible lining is required.

CASTORS

Outrigger Feet

Optional castors make wall frames mobile, for added flexibility in open-plan spaces. (Maximum 3 Walls linked)

Double Sided Low & Mid Walls only require plain castors. Single Sided Walls and High Double Sided Walls include outrigger feet.

Adding Castors increases height by 50mm

END FRAMES:

End Frames need to be fitted to the ends of all wall runs, capping off fixing holes, aiding rigidity and creating an enclosed frame appearance.

When additional rigidity is required, such as when Drop-in Desks are used, Slatted or Panelled End Frames are recommended.

Panelled End Frames available in Birch Ply, Valchromat, Bamboo or Upholstered.

LINK FRAMES & CORNER KITS:

Link Frames allow walls of varying heights to be connected, as well as providing fixing points for Corner Kits.

Corner Kits allow for two, three or four walls to be joined at triangular or square intersections. Create a simple change of direction, or link several wall runs together to create multiple enclosed areas.

Powder coated metalwork available in standard colours, as per frames.
Panel elements available in Natural Birch Ply, Valchromat in Light Grey or Black.

SUSTAINABILITY

33%	RECYCLED CONTENT
99%	RECYCLABLE

This product has been designed using high quality materials and craftsmanship to ensure it's longevity, however at the end of this products life it can be returned to **sixteen3** for refurbishment or recycling.

For FSC® Chain of Custody specify when ordering.

Warranty Information

5 YEAR - NORMAL FAIR WEAR & TEAR

This includes the structure and any foam/padding materials. Fabrics are covered by fabric manufacturers' warranties, usually 5 years, dependant on fabric choice.

Please refer to full **sixteen3** Warranty information document for more details. **sixteen3** ltd reserve the right to update product data information without prior notice.

Cleaning & Maintenance

GENERAL MAINTENANCE

- Vacuum upholstery regularly to remove dust and grit.
- Most hard surfaces can be cleaned with a soft cloth, dampened with a small amount of water and buffed dry.
- Clean spills and stains quickly to prevent them setting in (see specific fabric care instructions below).
- If being used in a spill/stain prone area specify an appropriate finish with stain-repellent properties.

Refer to fabric manufacturers own guidelines for specific information.

NATURAL FABRICS

In addition to regular vacuuming, wool and other natura fibres can usually be cleaned using appropriate upholstery shampoo. For a deeper clean it is best that wool be dry cleaned, as over-wetting can cause shrinkage and appearance change. Never apply bleach, ammonnia, alkali or strong acids to wool upholstery.

SYNTHETIC FABRICS

Vacuuming is the best regular maintenance followed by speed of action to remove spills and stains rapidly as soon as they occur. Most synthetic fabrics can be wiped down with a water soaked damp cloth without fear of damaging fibre or removing colour. Stubborn stains can be removed with a quality upholstery shampoo.

LEATHER

Leather should be regularly dusted with a soft cloth and vacuumed with a soft brush extension. Most types of aniline can also be treated with specialist products to help preserve colour/finish etc. As leather is a natural material, discrepancies in surface texture and 'puddling' in seat areas is to be expected.

WOOD FINISHES

Clean surfaces regularly with a slightly damp cloth and buff dry with a soft duster. The finish on all wood and laminate surfaces is designed to withstand moderate heat and some spillages, but all spillages should be wiped off with a damp cloth straight away. Do not drag any objects across any table tops. Certain wood finishes will naturally change in appearance with age. We cannot guarantee an exact match of any timber products.

POWDER COATED & PAINTED

Clean surfaces regularly with a slightly damp cloth and a mild solution of soapy water. Buff dry with a soft duster.

PLASTICS

Clean surfaces regularly with a slightly damp cloth and a mild solution of soapy water. Buff dry with a soft duster.
