

Fuse 2

An enhanced version of one of our most popular seating ranges, **Fuse 2** features a softer silhouette and more inviting design than before, whilst still offering the same extensive modularity and function. The gently rounded silhouette and sinuous curves create a soft and inviting seating area, making **Fuse 2** a comfortable option for both private and collaborative environments.

High back versions have the ability to absorb ambient noise making it an excellent acoustic option for busy workplaces and high-traffic areas. With a range of configurations available, including four back heights and additional drop in-desks, **Fuse 2** allows for endless combinations and sizes.

This product has been designed using high quality materials and craftsmanship to ensure its longevity, however at the end of this products life it can be returned to **sixteen3** for refurbishment or recycling

For FS chain of custody specify when ordering.

Warranty Information

5 Year - Optional Warranty

This includes the structure and any foam padding materials. Fabrics are covered by fabric manufacturers' warranties, usually 5 years, dependant on fabric choice.

Please refer to full sixteen3 warranty information document for more details. sixteen3 Ltd reserve the right to update product data information without prior notice.

Standards

FLAMABILITY

The foams & fillings of this product meet BS EN 5852: Part 2, in accordance with The Furniture and Furnishings (Fire) (Safety) Regulations 1988.

TESTING

Designed to meet & exceed BS 1139:2013 - Strength, Durability and Safety requirements for non-domestic seating.

Cleaning & Maintenance

GENERAL

- Vacuum upholstery regularly to remove dust and grit.
- Most hard surfaces can be cleaned with a soft cloth, dampened with a small amount of water and buffed dry.
- Clean spills and stains quickly to prevent them setting in (see specific fabric care instructions below).
- If being used in a spill/stain prone area specify an appropriate finish with stain-repellent properties.

Refer to fabric manufacturers own guidelines for specific information.

Wool & Natural Fabrics

In addition to regular vacuuming, wool and other natural fibres can usually be cleaned using appropriate upholstery shampoo. For a deeper clean it is best that wool be dry cleaned, as over-wetting can cause shrinkage and appearance change. Never apply bleach, ammonia, alkali or strong acids to wool upholstery.

Synthetic Fabrics

Vacuuming is the best regular maintenance followed by speed of action to remove spills and stains rapidly as soon as they occur. Most synthetic fabrics can be wiped down with a water soaked damp cloth without fear of damaging fibre or removing colour. Stubborn stains can be removed with a quality upholstery shampoo.

Leather

Leather should be regularly dusted with a soft cloth and vacuumed with a soft brush extension. Most types of aniline can also be treated with specialist products to help preserve colour finish etc. As leather is a natural material, discrepancies in surface texture and 'puddling' in seat areas is to be expected.

Other Materials

Clean surfaces regularly with a slightly damp cloth and a mild solution of soapy water. Buff dry with a soft duster.
