About Us

We are furniture designers and manufacturers established in the North of the UK with a passion for creativity and craftsmanship. Simplicity and quality define our approach.

We believe in creating timeless products that are made to last.

Our People

People are at the heart of everything we do. Our insightful and knowledgeable sales team, passionate and innovative design department, and our vast number of highly skilled craftsmen and women are the very soul of **sixteen3**. We are proud to have a dedicated team who are committed to designing and manufacturing the very best in upholstered commercial seating right here in Cheshire.

Our Designs

We are passionate about beautiful and timeless design. Our in-house design team are consistently focussed on innovating with form and colour, researching materials and pushing the boundaries of product life cycle. Ensuring timeless and long-lasting pieces which fuse both durability and style. We're inspired by the world around us, by nature, architecture and art to continually experiment with pleasing forms and eye-catching design details.

Our Community

Established in 2009, we pride ourselves upon over a decade of expertise and experience. Our small business values are combined with big company dreams and aspirations, driving us to evolve not only ourselves but to help grow the communities around us. We always endeavour to work with other local businesses where we can, and strive to support our fellow British companies and craftspeople.

Our Planet

We pledge to do everything we can to ensure we leave as little impact on the Earth as possible. Sustainability is at the forefront in the creation of our products and we're inspired to evolve and be better with every new furniture range. Our designs feature a multitude of ground-breaking recyclable and renewable materials, like fast growing bamboo and recycled plastics. We're under no illusions though, we accept that nothing can last forever, which is why we also offer products which can be dismantled and recycled, as well returned to us for reupholstering or repurposing.

We believe good environmental practices go hand in hand with good product quality and have been certified that we meet both ISO 9001 Quality Management and ISO 14001 Environmental Management systems.

sixteen3

Sustainability

Respect for the environment has been at the forefront of **sixteen3**'s ethos since our founding over a decade ago. We believe that caring for the planet is our lifelong responsibility which is why we strive to reduce our environmental footprint in all aspects of our business. From the processes we use and the products we manufacture to the way our products are transported and their future lifecycles, we're continuously working to ensure we undertake the best, most sustainable practices every step of the way.

We understand that everything we do individually and collectively impacts our environment and our shared futures, as well as the futures of generations to come.

Considered Design

We're aware of the complex challenges that committing to sustainability involves, which is why our design team is invested in researching and innovating to create the best products we possibly can. With a focus on quality, longevity, efficiency, materials and end-of-life considerations, we're dedicated to applying a sustainable mind-set to every stage of the design process. We're proud to use the best in quality materials, sustainably-sourced timber and British steel, whilst sourcing new pioneering materials in our pursuit to go above and beyond industry expectations.

We know that the environmental footprint of a product is determined at the design stage, this is where we apply our knowledge to ensure every **sixteen3** range is created with an essence of sustainability. Working to not only ensure our new ranges meet the highest standards of sustainable design and innovation, but we also recognise the importance of reviewing and adapting older ranges to guarantee our ever-evolving standards are being sustained across the board.

Conscious Materials

At **sixteen3** we put extra care and attention into sourcing materials for our products. We look for recyclable, recycled and renewable material properties when designing our ranges, this ensures we keep our carbon footprint to a minimum and means our products are as good for the planet as they can be. We work closely with our supply partners to ensure that wood products come from well-managed, sustainably forested, sources and are Forest Stewardship Council® (FSC) certified. We're also leading the way with our use of alternative sustainable materials like bamboo, waste agricultural fibre board and recycled plastics which offer a plethora of environmental benefits over traditional materials, boasting accolades such as 100% recycled content, 100% recyclability and even negative carbon footprints.

Manufacturing & Business Operations

The way we manufacture our products is undoubtedly one of the most significant factors contributing to our environmental impacts as a business. We recognise that we hold the power to cause significant damage to our planet with the products we create and the methods we use. Careful consideration and planning go into all stages of our manufacturing, the suppliers we work with, how we manage waste materials and championing efficient processes are just some of the methods we employ to be certain we're doing the best we can for the environment. It's not only the materials within our products which have an impact but also the way we package them; 31% of the packaging we use to send out our furniture is made from recycled material.

We realise that committing to sustainability revolves around ourselves, our practices and our people. To truly be considered a sustainable business we have to practice what we preach and embed a culture of sustainability within every layer of our company. This is why we're committed to regularly reviewing our internal operations, from energy usage and building efficiency to vehicles and waste management we accept that we can always be better and do better.

Air Quality & Wellbeing

The quality of the air we breathe plays a vital role in our everyday health, whether that's in the home, outdoors or at the office. As a society, we're familiar with outdoor air pollution and fumes, but the everyday objects in our indoor environments can also harm our air quality, this is quite substantial when the average person spends over 70% of their time indoors. Volatile organic compounds (VOCs) can be found in emissions from materials and substances which have an adverse effect on respiratory health. At **sixteen3** we want to ensure our furniture isn't negatively contributing to our customers' environments, so we take extra care to identify the most harmful substances and use alternative methods and materials. Solvent-based lacquers are a well-known culprit where VOCs are concerned, which is why we always opt for water-based lacquers and paints.

A Sustainable Future

Furniture should never be considered a disposable commodity; with a bit of clever design, careful planning and the provision of transparent information it's entirely avoidable for products to end up in landfill sites. We have product ranges which feature the ability to be easily dismantled, this allows for any damaged parts to be replaced, and provides the freedom to make updates to colour schemes. This simple design method prolongs the life of the furniture and also provides the ability to separate and recycle all components at the end of the product's life. We also offer a Furniture Take-Back scheme whereby aged products can be returned to us for repair or re-upholstery to give them a new lease of life.

We recognise that our endeavour to create a sustainable business is never finished. We're dedicated to pushing our sustainability initiatives as far as we can, perpetually growing and developing our company mind-set, processes and products. We're working on our future environmental action plan by identifying areas for improvement and continually researching the latest services and technologies we can utilise to push our sustainable and environmental credibility.

Monsal

Inspired by one of our favourite footpaths through the rolling hills of the Peak District, Monsal is a compact and size-adjustable bench seating range. Connect the benches end-to-end to create long runs of banquette or backless bench seating, reminiscent of the train carriages that once steamed along the railway, now the Monsal Trail footpath.

With a range of design options available, this simple bench system can adapt to a range of interior purposes and styles. Plinth, leg and castor options diversify Monsals functionality, while custom sizing provides a sleek built-in aesthetic.

CUSTOM SIZING

Benches can be modified to any width, up to **600mm** wide or **1200mm** wide.
Choose the closest size that exceeds your requirements out of the width options above.

A one-off charge applies per size modification.

For examples of pricing see next page.

LINKING

Linking mechanisms will only be fitted to the units subject to layout plans being provided.
Alternatively, mechanisms will be free-issued.

sixteen3

To give a better understanding on how to price custom-sized Monsal benches we have compiled the below examples:
Straight Run

1150mm 1150mm 1150mm
3450mm

To create a bench running the length of a 3450mm wall the following split can be created:

COST BREAKDOWN

**3no. 1150mm Benches:**
3x MON-120-B + 1x **Customisation charge**

Booth Layout

900mm

To create custom-sized booth setups between stud-wall partitions or in alcoves:

COST BREAKDOWN

4no. 900mm Benches: 4x MON-120-B
+ 1x **Customisation charge**

White   Black

POWER

Optional Power Modules available.

Fuse 2

An enhanced version of one of our most popular seating ranges, **Fuse 2** features a softer silhouette and more inviting design than before, whilst still offering the same extensive modularity and function. The gently rounded silhouette and sinuous curves create a soft and inviting seating area, making **Fuse 2** a comfortable option for both private and collaborative environments.

High back versions have the ability to absorb ambient noise making it an excellent acoustic option for busy workplaces   and high-traffic areas. With a range of configurations available,
including four back heights and additional drop in-desks, **Fuse 2** allows for endless combinations and sizes.

sixteen3

Tuk

A side table which simply "Tuks" itself in. **Tuk** is a compact and versatile side table designed to integrate with most of our seating ranges. Perfect for a quick stop to jot some notes in a diary, type on laptop or just for resting a cup of coffee.

Upgrade a **Sedir** sofa by placing a **Tuk** between two seat sections, or elevate the functionality of Monsal benches by placing **Tuk** at the side. With six tabletop finishes and twenty four metal colours to choose from, **Tuk** can effortlessly blend in or playfully contrast with any range you choose to integrate it with.

sixteen3

Tuk

Product Code	TUK-xx
Dimensions	W300 x D500 x H650mm

Tuk tables are fixed onto the sides of soft seating ranges through the upholstery and can be incorporated into the following ranges:

Sedir, Fuse 2, Tolv, Monsal, Arny Lite, Pop.

TABLE TOP FINISH:

Smile Plastic Charcoal
+SPC

When ordering please specify by replacing 'xx' with tabletop code.

sixteen3

Sedir

Taking its name from the decadent, sprawling seating used in Ottoman palaces, Sedir is a modern interpretation of the long, low, comfortable sofas which can adapt to any interior setting and need.

Consciously designed for exceptional levels of comfort, the Sedir range allows you to create relaxed and informal meeting points, boosting communication and interaction between teams & employees.

Backrests and armrests are designed to be at the perfect height to perch on for a brief chat or a quick break away from a desk.

sixteen3

Sustainable choices.

Sedir frames are constructed using 62% AFB (Agricultural Fibre Board), a natural, continuously renewable by-product of the agricultural industry.

Made with straw and reeds, AFB utilises left-over materials which would otherwise be disposed of by composting or burning. Both disposal processes release any CO2 the plants have absorbed throughout their growth into the atmosphere, partially undoing any positive environmental effects the crops have on our planet.

Instead, by repurposing these byproducts the carbon absorbed during their growth is stored and the environmental implications are negated.

sixteen3

Reece

Balancing Japandi Design with a Circular Ethos, **Reece** is where minimalist style meets sustainability. With a focus on product lifecycle and sustainable materials, **Reece** offers some of the most environmentally responsible options in our product portfolio.

Components are designed for disassembly, promoting easy separation for repair and updates, and ensuring 100% recyclability at the end of life. Paired with sustainable material choices including Bamboo, Recycled Plastic, and AFB, and characterised by its minimalistic design, **Reece s**tands as the epitome of sustainable sofa ranges.
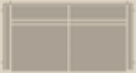

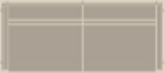

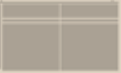

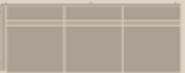

sixteen3

Sustainable choices.

Reece fully upholstered frames are now made using AFB (Agricultural Fibre Board), a natural, continuously renewable by-product of the agricultural industry.

Made with straw and reeds, AFB utilises left-over materials which would otherwise be disposed of by composting or burning. Both disposal processes release any CO_2 the plants have absorbed throughout their growth into the atmosphere, partially undoing any positive environmental effects the crops have on our planet.

Instead, by repurposing these byproducts the carbon absorbed during their growth is stored and the environmental implications are negated.

POWER

Power modules available.

TABLES

Side tables & drop-in desks available.

Frames can be constructed using 100% Recycled Plastic panels, helping to divert waste from landfill.

Used as an exposed surface, the recycled board has a raw, honest quality, with a speckled surface and rough hewn edges. Surface scratches & blemishes may be apparent in the surfaces and will wear with time, consistent with the 'un-polished' nature of this humble material.

Alternatively, the recycled frame can be fully upholstered, giving the luxurious appearance of a fully upholstered sofa with strong eco-credentials.

sixteen3

Calvert

Inspired by Calvert Vaux, the mastermind behind New York's Central Park. Breaking up a grid system to create spaces to focus, collaborate, relax and inspire.

Steel frame walls, available in three heights, act as room dividers, with the louvre-style grid pattern diffusing visibility between areas without creating a definite wall.

Infinitely scalable, the system can grow, adapt, and be reconfigured as spaces evolve and can be used to create landscapes from simple partitions to all-encompassing 'room-within-a-room' environments.

1000mm Wide Storage Wall
CA-DSCB30-100-xx
W1000 x D600mm

For additional stability Wall Frames can be floor fixed.
Alternatively, Steel weighted ballasts can be fitted to base panels

Tops of High Walls used in open atrium areas can be supplied with additional top panels to cap off visibility of fixings or cabling.

PLANTERS

Add planters to top of Low or Mid Frames. Solid finish options as per Wall Frames.

	750mm Wide Single Sided	750mm Wide Double Sided	1000mm Wide Single Sided	1000mm Wide Double Sided
Product Code	+PL	+PL	+PL	+PL

Note: Plants not included. For real planting waterproof lining will be required.

CASTORS

Optional castors make wall frames mobile, for added flexibility in open-plan spaces. (Maximum 3 Walls linked)

Double Sided Low & Mid Walls only require plain castors.
Single Sided Walls and High Double Sided Walls include outrigger feet.

Adding Castors increases height by 50mm

Outrigger Feet

sixteen3

END FRAMES:

End Frames need to be fitted to the ends of all wall runs, capping off fixing holes, aiding rigidity and creating an enclosed frame appearance.

When additional rigidity is required, such as when Drop-in Desks are used, Slatted or Panelled End Frames are recommended.

Panelled End Frames available in Birch Ply, Valchromat in Light Grey or Brack, or Upholstered.

LINK FRAMES & CORNER KITS:

Link Frames allow walls of varying heights to be connected, as well as providing fixing points for Corner Kits.

Corner Kits allow for two, three or four walls to be joined at triangular or square intersections. Create a simple change of direction, or link several wall runs together to create multiple enclosed areas.
Powder coated metalwork available in standard colours, as per frames.
Panel elements available in Natural Birch Ply, Valchromat in Light Grey or Black.

Hugg

Human Design.

Hugg has been created to humanize spaces, with a friendly, elegant and refined design.

The organic curves are designed to promote warmth and communication whilst the well-defined silhouette of the seat shell incorporates integrated armrests low enough to fit under tables, and supportive enough to accommodate the body comfortably for longer periods of sitting, perfect for meeting rooms, waiting areas, breakout spaces and many other active work and social environments.

Hex

Taking its visual cues from nature, distilled into geometric simplicity, the Hex range can take on numerous environments. Can be used individually as additional flexible seating with a twist, or used in groups to provide larger landscapes. Combining the different heights creates environments influenced by the rock formations of the Giant's Causeway.

Timber frames with CME foam padding.

Plastic glides or powder coated steel pedestal bases.

Link

Unparalleled modularity, bold minimalist forms, and a distinctive statement leg. **Link**'s graphic styling and configurable nature empowers limitless creative freedom.

Create sweeping curved benches, arching seating islands or structured geometric layouts. The chunky hairpin leg is designed for a lively pop of colour, or dress it down with a subtle neutral finish, adapting seamlessly to both vibrant and formal settings.

Optional backs and armrests encourage relaxed, free-form seating while the compact footprint and extensive modularity make **Link** the perfect solution for smaller spaces.

Timber frames with CME foam padding. Powder coated steel legs.

Product Code	TOLV-12-P	TOLV-16-P
Dimensions	H250 Max W1200mm	H250 Max W1600mm

WALL PANELS

Upholstered Wall Panels can be fixed to walls above **Tolv** benches to create a higher back and a more built-in aesthetic.

Custom widths up to **1200mm** and **1600mm** wide can be produced at no additional cost.

CUSTOM SIZING

Benches can be modified to any width, up to **1200mm** wide or **1600mm** wide.
Choose the closest size that exceeds your requirements out of the width options above.

A one-off charge applies per size modification.
For custom width Wall Panels there is no addition charge.

For examples of pricing see next page.

EXPOSED BACKS

Standard **Tolv** benches are designed to sit against a wall, and as such external backs are upholstered in a black lining cloth as standard. Should a fully upholstered backrest be required please specify.

PATTERNED FABRICS

Due to fabric widths any patterned fabrics on 1600mm versions will run along the width of the unit.
If patterns need to run verticaly down the unit additional charges may apply.

LINKING

Linking mechanisms will only be fitted to the units subject to layout plans being provided.
Alternatively, mechanisms will be free-issued.

POWER

Porthole Power modules can be incorporated into seat fronts on request.

REDUCED DEPTH
Units can be produced at a reduced depth of **640mm** and Back-to-Back units can be produced for use in tight spaces, with no additional upcharges.
Please specify when ordering.

Milo

With an architecturally inspired, asymmetric silhouette, Milo tables add an element of creativity and intrigue to any environment. Expertly curated design details give Milo a unique identity, whilst extensive finish combinations make it perfectly adaptable for any interior style.

Clever invisible fixing methods allow Milo tables to be shipped flat-packed. This reduces packaging requirements and allows for considerably reduced transport volume, significantly lowering the environmental impact.
