About Us

We are furniture designers and manufacturers established in the North of the UK with a passion for creativity and craftsmanship. Simplicity and quality define our approach.

We believe in creating timeless products that are made to last.

Our People

People are at the heart of everything we do. Our insightful and knowledgeable sales team, passionate and innovative design department, and our vast number of highly skilled craftsmen and women are the very soul of **sixteen3**. We are proud to have a dedicated team who are committed to designing and manufacturing the very best in upholstered commercial seating right here in Cheshire.

Our Designs

We are passionate about beautiful and timeless design. Our in-house design team are consistently focussed on innovating with form and colour, researching materials and pushing the boundaries of product life cycle. Ensuring timeless and long-lasting pieces which fuse both durability and style. We're inspired by the world around us, by nature, architecture and art to continually experiment with pleasing forms and eye-catching design details.

Our Community

Established in 2009, we pride ourselves upon over a decade of expertise and experience. Our small business values are combined with big company dreams and aspirations, driving us to evolve not only ourselves but to help grow the communities around us. We always endeavour to work with other local businesses where we can, and strive to support our fellow British companies and craftspeople.

Our Planet

We pledge to do everything we can to ensure we leave as little impact on the Earth as possible. Sustainability is at the forefront in the creation of our products and we're inspired to evolve and be better with every new furniture range. Our designs feature a multitude of ground-breaking recyclable and renewable materials, like fast growing bamboo and recycled plastics. We're under no illusions though, we accept that nothing can last forever, which is why we also offer products which can be dismantled and recycled, as well returned to us for reupholstering or repurposing.

We believe good environmental practices go hand in hand with good product quality and have been certified that we meet both ISO 9001 Quality Management and ISO 14001 Environmental Management systems.

sixteen3

Sustainability

Respect for the environment has been at the forefront of **sixteen3**'s ethos since our founding over a decade ago. We believe that caring for the planet is our lifelong responsibility which is why we strive to reduce our environmental footprint in all aspects of our business. From the processes we use and the products we manufacture to the way our products are transported and their future lifecycles, we're continuously working to ensure we undertake the best, most sustainable practices every step of the way.

We understand that everything we do individually and collectively impacts our environment and our shared futures, as well as the futures of generations to come.
Considered Design

We're aware of the complex challenges that committing to sustainability involves, which is why our design team is invested in researching and innovating to create the best products we possibly can. With a focus on quality, longevity, efficiency, materials and end-of-life considerations, we're dedicated to applying a sustainable mind-set to every stage of the design process. We're proud to use the best in quality materials, sustainably-sourced timber and British steel, whilst sourcing new pioneering materials in our pursuit to go above and beyond industry expectations.

We know that the environmental footprint of a product is determined at the design stage, this is where we apply our knowledge to ensure every **sixteen3** range is created with an essence of sustainability. Working to not only ensure our new ranges meet the highest standards of sustainable design and innovation, but we also recognise the importance of reviewing and adapting older ranges to guarantee our ever-evolving standards are being sustained across the board.

Conscious Materials

At **sixteen3** we put extra care and attention into sourcing materials for our products. We look for recyclable, recycled and renewable material properties when designing our ranges, this ensures we keep our carbon footprint to a minimum and means our products are as good for the planet as they can be. We work closely with our supply partners to ensure that wood products come from well-managed, sustainably forested, sources and are Forest Stewardship Council® (FSC) certified. We're also leading the way with our use of alternative sustainable materials like bamboo, waste agricultural fibre board and recycled plastics which offer a plethora of environmental benefits over traditional materials, boasting accolades such as 100% recycled content, 100% recyclability and even negative carbon footprints.

Manufacturing & Business Operations

The way we manufacture our products is undoubtedly one of the most significant factors contributing to our environmental impacts as a business. We recognise that we hold the power to cause significant damage to our planet with the products we create and the methods we use. Careful consideration and planning go into all stages of our manufacturing, the suppliers we work with, how we manage waste materials and championing efficient processes are just some of the methods we employ to be certain we're doing the best we can for the environment. It's not only the materials within our products which have an impact but also the way we package them; 31% of the packaging we use to send out our furniture is made from recycled material.

We realise that committing to sustainability revolves around ourselves, our practices and our people. To truly be considered a sustainable business we have to practice what we preach and embed a culture of sustainability within every layer of our company. This is why we're committed to regularly reviewing our internal operations, from energy usage and building efficiency to vehicles and waste management we accept that we can always be better and do better.

Air Quality & Wellbeing

The quality of the air we breathe plays a vital role in our everyday health, whether that's in the home, outdoors or at the office. As a society, we're familiar with outdoor air pollution and fumes, but the everyday objects in our indoor environments can also harm our air quality, this is quite substantial when the average person spends over 70% of their time indoors. Volatile organic compounds (VOCs) can be found in emissions from materials and substances which have an adverse effect on respiratory health. At **sixteen3** we want to ensure our furniture isn't negatively contributing to our customers' environments, so we take extra care to identify the most harmful substances and use alternative methods and materials. Solvent-based lacquers are a well-known culprit where VOCs are concerned, which is why we always opt for water-based lacquers and paints.

A Sustainable Future

Furniture should never be considered a disposable commodity; with a bit of clever design, careful planning and the provision of transparent information it's entirely avoidable for products to end up in landfill sites. We have product ranges which feature the ability to be easily dismantled, this allows for any damaged parts to be replaced, and provides the freedom to make updates to colour schemes. This simple design method prolongs the life of the furniture and also provides the ability to separate and recycle all components at the end of the product's life. We also offer a Furniture Take-Back scheme whereby aged products can be returned to us for repair or re-upholstery to give them a new lease of life.

We recognise that our endeavour to create a sustainable business is never finished. We're dedicated to pushing our sustainability initiatives as far as we can, perpetually growing and developing our company mind-set, processes and products. We're working on our future environmental action plan by identifying areas for improvement and continually researching the latest services and technologies we can utilise to push our sustainable and environmental credibility.

Otto

Designed as a nod to one of the most influential design movements of the 20th Century, **Otto** echoes the principles of the Bauhaus movement. Emphasising beauty in simplicity and function, **Otto** is a comfortable and minimalist range of armchairs, sofas and modular components, allowing the freedom to construct expansive and refined seating layouts.

The soft, inviting upholstery is supported by slender steel legs, giving **Otto** a light, effortless and almost floating appearance. Perfect for areas where space is at a premium, **Otto** has been designed to be spatially considerate, without compromising on its classic and elegant appeal.

sixteen3

Monsal

Inspired by one of our favourite footpaths through the rolling hills of the Peak District, Monsal is a compact and size-adjustable bench seating range. Connect the benches end-to-end to create long runs of banquette or backless bench seating, reminiscent of the train carriages that once steamed along the railway, now the Monsal Trail footpath.

With a range of design options available, this simple bench system can adapt to a range of interior purposes and styles. Plinth, leg and castor options diversify Monsals functionality, while custom sizing provides a sleek built-in aesthetic.

CUSTOM SIZING

Benches can be modified to any width, up to **600mm** wide or **1200mm** wide.
Choose the closest size that exceeds your requirements out of the width options above.

A one-off charge applies per size modification.

For examples of pricing see next page.

LINKING

Linking mechanisms will only be fitted to the units subject to layout plans being provided.
Alternatively, mechanisms will be free-issued.

sixteen3

Monsal

To give a better understanding on how to price custom-sized Monsal benches we have compiled the below examples:

Straight Run

1150mm   1150mm   1150mm
3450mm

To create a bench running the length of a 3450mm wall the following split can be created:

COST BREAKDOWN

3no. 1150mm Benches:
3x MON-120-B + 1x Customisation charge

Booth Layout
900mm

To create custom-sized booth setups between stud-wall partitions or in alcoves:

COST BREAKDOWN

4no. 900mm Benches: 4x MON-120-B
+ 1x Customisation charge

sixteen3

Artus

Meaning 'Framework' in Latin, **Artus** is a visually striking modular screen system. Its playful design draws inspiration from post-modernist art and architecture. Featuring different sized panels with square or arced corners which combine to form freestanding walls and partitions.

Drop-in desks can be added to create workspaces and our **Monsal** benches pair effortlessly with **Artus** to form comfortable meeting booths.

Artus
Connect

Artus Connect combines an AV-enabled Artus wall with functional table surfaces, forming various sizes of media wall and meeting table that seamlessly blend with the style of our other products.

An essential for flexible and agile working spaces, Artus Connect tables can be used as standing desks, with stools and chairs, or combined with sofas like High Back Reece to create a more private meeting booth feel. With various sizes and table heights available, you can build Artus Connect into larger Artus wall layouts for an integrated feel or keep it as a standalone piece for an equally effective static or flexible unit.

A discrete zip allows cables from power units or AV to be neatly concealed inside the wall. See further details below to explore the options of Booth Tables, Meeting Tables, Mobile Meeting Tables, and Betto Meeting Tables.

sixteen3

Artus Connect

AV SCREEN SIZES:

Maximum AV Screen Size of 32" or 43", depending on version. Refer to Product Card for detail.

sixteen3

Artus
Nest

Escape the bustle of busy workspaces with Artus Nest, this solo workspace pod is a sought after retreat for focused work. Designed to seamlessly combine elements from the Monsal and Artus ranges, ensuring visual harmony with other Monsal and Artus products.

Artus Nest comes equipped with a built-in writing tablet, perfect for enoying a cup of coffee, jotting down notes, or a brief laptop session. Enclosed by Artus panels, it creates an acoustic cocoon, enhancing concentration by dampening external noise.

POWER

Porthole power modules can be incorporated into seat side on request.

Phase power modules can be incorporated under seat fronts.

sixteen3

Sedir

Taking its name from the decadent, sprawling seating used in Ottoman palaces, Sedir is a modern interpretation of the long, low, comfortable sofas which can adapt to any interior setting and need.

Consciously designed for exceptional levels of comfort, the Sedir range allows you to create relaxed and informal meeting points, boosting communication and interaction between teams & employees.

Backrests and armrests are designed to be at the perfect height to perch on for a brief chat or a quick break away from a desk.

sixteen3

Sustainable choices.

Sedir frames are constructed using 62% AFB (Agricultural Fibre Board), a natural, continuously renewable by-product of the agricultural industry.

Made with straw and reeds, AFB utilises left-over materials which would otherwise be disposed of by composting or burning. Both disposal processes release any CO2 the plants have absorbed throughout their growth into the atmosphere, partially undoing any positive environmental effects the crops have on our planet.

Instead, by repurposing these byproducts the carbon absorbed during their growth is stored and the environmental implications are negated.

Fuse 2

An enhanced version of one of our most popular seating ranges, **Fuse 2** features a softer silhouette and more inviting design than before, whilst still offering the same extensive modularity and function. The gently rounded silhouette and sinuous curves create a soft and inviting seating area, making **Fuse 2** a comfortable option for both private and collaborative environments.

High back versions have the ability to absorb ambient noise making it an excellent acoustic option for busy workplaces   and high-traffic areas. With a range of configurations available,
including four back heights and additional drop in-desks, **Fuse 2** allows for endless combinations and sizes.

sixteen3

Reece

Balancing Japandi Design with a Circular Ethos, **Reece** is where minimalist style meets sustainability. With a focus on product lifecycle and sustainable materials, **Reece** offers some of the most environmentally responsible options in our product portfolio.

Components are designed for disassembly, promoting easy separation for repair and updates, and ensuring 100% recyclability at the end of life. Paired with sustainable material choices including Bamboo, Recycled Plastic, and AFB, and characterised by its minimalistic design, **Reece s**tands as the epitome of sustainable sofa ranges.

sixteen3
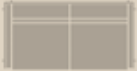

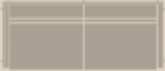

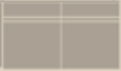

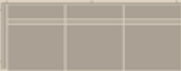

Sustainable choices.

Reece fully upholstered frames are now made using AFB (Agricultural Fibre Board), a natural, continuously renewable by-product of the agricultural industry.

Made with straw and reeds, AFB utilises left-over materials which would otherwise be disposed of by composting or burning. Both disposal processes release any CO_2 the plants have absorbed throughout their growth into the atmosphere, partially undoing any positive environmental effects the crops have on our planet.

Instead, by repurposing these byproducts the carbon absorbed during their growth is stored and the environmental implications are negated.

POWER

Power modules available.

TABLES

Side tables & drop-in desks available.

Frames can be constructed using 100% Recycled Plastic panels, helping to divert waste from landfill.

Used as an exposed surface, the recycled board has a raw, honest quality, with a speckled surface and rough hewn edges. Surface scratches & blemishes may be apparent in the surfaces and will wear with time, consistent with the 'un-polished' nature of this humble material.

Alternatively, the recycled frame can be fully upholstered, giving the luxurious appearance of a fully upholstered sofa with strong eco-credentials.

sixteen3

Reece

High Back

Perfect for open-plan spaces, Reece High Back offers a pared-back, comfortable seating option for areas requiring an extra level of visual and acoustic privacy.

sixteen3

Ada

A timeless ottoman range with luxurious detailing. **Ada** is designed to encourage combinations of fabric and pattern, adding character and creating layered spaces.

Characterised by a classic style, piping details and split cylindrical form, **Ada** serves as a versatile foundation for infusing personality into any interior. Balancing simplicity with intricate detailing, **Ada** is effortless in all styles thanks to multiple fabric and piping combinations. Create a tonal and luxurious accessory piece, choose contrast piping for a vibrant focal point, or colour drench for an elegant and understated design staple.

Available in three sizes and with options for discreet glides or castor feet.

Timber frames with CME foam padding.

Hugg

Human Design.

Hugg has been created to humanize spaces, with a friendly, elegant and refined design.

The organic curves are designed to promote warmth and communication whilst the well-defined silhouette of the seat shell incorporates integrated armrests low enough to fit under tables, and supportive enough to accommodate the body comfortably for longer periods of sitting, perfect for meeting rooms, waiting areas, breakout spaces and many other active work and social environments.

Romy

A spacious and elegant lounge chair range designed for optimal comfort with an air of contemporary grandeur. **Romy** offers a refined approach to relaxation in interior spaces, combining sophisticated aesthetics with luxurious comfort. With two distinct height options—mid or high back— **Romy** adapts to a plethora of preferences and aesthetics.

High back **Romy** features a prominent wing design, creating a dramatic silhouette and enhancing acoustics. The perfect focal point in a space, the high back is ideal for private conversations or a quiet retreat from the hustle and bustle. Mid back **Romy** offers a more open presence for enhanced sight lines, perfect for creating inviting, social areas or collaborative workspaces.

Romy ensures seamless integration into any interior scheme, with three versatile leg styles to choose from.

Shell in moulded cold cured polyurethane foam over steel frame. Internal sprung seat for added comfort.

Adytum
Media Table

Adytum Media Tables provide the perfect spot for collaborative presentations & discussions.

Spacious enough to accommodate a group, the tables are available in two size options, with Standard or Poseur Height version allowing for different sitting styles and provide a break in height across open spaces. The curved end makes for a more social setup. The fully upholstered wall panel can take AV equipment, perfect for presentations, whilst the table base conceals cable management for a clean & minimalist look. Optional power modules add functionality of mobile IT equipment.

Timber frame with upholstered finish. Laminate table top.

Millie

Millie is a freestanding shelving range which shares the same design language as our **Milo** table collection. Designed to be effortlessly simple, **Millie** offers a sleek storage solution that can integrate into any space.

Whether adorning a wall as a console table or standing tall as a statement shelf, **Millie** adds an air of elegance to any room. Arrange multiple **Millie** units in a row for a cohesive shelving solution, or use them as room dividers to create visually open boundaries between spaces.

Mix and match different heights to add depth and personality to a space. For those seeking a more fitted look and added height, Millie's cupboard base options offer additional versatility and storage.

Powder coated steel frames with steel or timber shelves. Cupboards in MFC.

sixteen3

Calvert

Inspired by Calvert Vaux, the mastermind behind New York's Central Park. Breaking up a grid system to create spaces to focus, collaborate, relax and inspire.

Steel frame walls, available in three heights, act as room dividers, with the louvre-style grid pattern diffusing visibility between areas without creating a definite wall.

Infinitely scalable, the system can grow, adapt, and be reconfigured as spaces evolve and can be used to create landscapes from simple partitions to all-encompassing 'room-within-a-room' environments.

For additional stability Wall Frames can be floor fixed.
Alternatively, Steel weighted ballasts can be fitted to base panels

Tops of High Walls used in open atrium areas can be supplied with additional top panels to cap off visibility of fixings or cabling.

PLANTERS

Add planters to top of Low or Mid Frames. Solid finish options as per Wall Frames.

Product Code	750mm Wide Single Sided	750mm Wide Double Sided	1000mm Wide Single Sided	1000mm Wide Double Sided
	+PL	+PL	+PL	+PL

Note: Plants not included. For real planting waterproof lining will be required.

CASTORS

Optional castors make wall frames mobile, for added flexibility in open-plan spaces. (Maximum 3 Walls linked)

Double Sided Low & Mid Walls only require plain castors.
Single Sided Walls and High Double Sided Walls include outrigger feet.

Adding Castors increases height by 50mm

Outrigger Feet

sixteen3

END FRAMES:

End Frames need to be fitted to the ends of all wall runs, capping off fixing holes, aiding rigidity and creating an enclosed frame appearance.

When additional rigidity is required, such as when Drop-in Desks are used, Slatted or Panelled End Frames are recommended.

Panelled End Frames available in Birch Ply, Valchromat in Light Grey or Brack, or Upholstered.

LINK FRAMES & CORNER KITS:

Link Frames allow walls of varying heights to be connected, as well as providing fixing points for Corner Kits.

Corner Kits allow for two, three or four walls to be joined at triangular or square intersections. Create a simple change of direction, or link several wall runs together to create multiple enclosed areas.
Powder coated metalwork available in standard colours, as per frames.
Panel elements available in Natural Birch Ply, Valchromat in Light Grey or Black.

Hex

Taking its visual cues from nature, distilled into geometric simplicity, the Hex range can take on numerous environments. Can be used individually as additional flexible seating with a twist, or used in groups to provide larger landscapes. Combining the different heights creates environments influenced by the rock formations of the Giant's Causeway.

Timber frames with CME foam padding.

Plastic glides or powder coated steel pedestal bases.

Link

Unparalleled modularity, bold minimalist forms, and a distinctive statement leg. **Link**'s graphic styling and configurable nature empowers limitless creative freedom.

Create sweeping curved benches, arching seating islands or structured geometric layouts. The chunky hairpin leg is designed for a lively pop of colour, or dress it down with a subtle neutral finish, adapting seamlessly to both vibrant and formal settings.

Optional backs and armrests encourage relaxed, free-form seating while the compact footprint and extensive modularity make **Link** the perfect solution for smaller spaces.

Timber frames with CME foam padding. Powder coated steel legs.

WALL PANELS

Upholstered Wall Panels can be fixed to walls above **Tolv** benches to create a higher back and a more built-in aesthetic.

Custom widths up to **1200mm** and **1600mm** wide can be produced at no additional cost.

CUSTOM SIZING

Benches can be modified to any width, up to **1200mm** wide or **1600mm** wide.
Choose the closest size that exceeds your requirements out of the width options above.

A one-off charge applies per size modification.
For custom width Wall Panels there is no addition charge.

For examples of pricing see next page.

EXPOSED BACKS

Standard **Tolv** benches are designed to sit against a wall, and as such external backs are upholstered in a black lining cloth as standard. Should a fully upholstered backrest be required please specify.

PATTERNED FABRICS

Due to fabric widths any patterned fabrics on 1600mm versions will run along the width of the unit.
If patterns need to run verticaly down the unit additional charges may apply.

LINKING

Linking mechanisms will only be fitted to the units subject to layout plans being provided.
Alternatively, mechanisms will be free-issued.

POWER

Porthole Power modules can be incorporated into seat fronts on request.

REDUCED DEPTH
Straight units can be produced at a reduced depth of **640mm** and Back-to-Back units can be produced for use in tight spaces, with no additional upcharges.
Please specify when ordering.

CUSTOM SIZING

Benches can be modified to any width, up to **1200mm** wide.

A charge applies per size modification.

CASTORS

Add castors to make planters mobile.

Increases height by 40mm

NOTE: Planting not supplied.
When live planting is used a waterproof membrane is required.

Planter internal dimensions: 1164 x D314 x H250mm

sixteen3

Eden

Where biophilia and soft furnishings meet. **Eden** planters reimagine the integration of plants in interior spaces by blending biophilia with interior decor. The soft, upholstered, geometric volumes are designed to seamlessly complement interiors alongside soft seating, cushions, and curtains.

Available in four distinct shapes and two heights, **Eden** planters provide endless possibilities for planting configurations. Designed to be used either as standalone pieces, grouped together, or integrated within seating layouts. Eden's varying shapes and heights allow for staggered, dynamic arrangements catering to various aesthetic preferences and spatial requirements.

Timber frames with CME foam padding & powder coated steel trim.

Betto

Betto, because we work 'Better Together'.
Inspiring creative collaboration and teamwork, Betto is a table range for large groups, catering to a variety of working styles. Seamless shapes create an inviting and flexible user-centric meeting space to comfortably gather, where nobody is faced with an awkward table leg or corner seat.

Combine different shapes and heights to form a multifunctional landscape. Standard height for seated meetings, counter height for agile and tactile working, or poseur height for a sit/stand workspace.

Available in 12 different laminate colours with 24 metal leg finish options, there are nearly 300 style combinations to inspire creativity and foster focus in any environment.

+

This curated collection of laminate colours has been chosen to pair with our metal finishes to offer bright, eye-catching combinations or subdued sophisticated palettes.
In addition to these colours, Betto tops are available in any standard Egger laminate finishes, at the prices shown.

Round colour tops need to be ordered in multiples of: Ø1000mm = 3no. / Ø1200mm = 2no.

No MOQ on Oval or D-End sizes.
